

## WHAT IS VICMOVE?

VICMOVE is a web3 fitness and lifestyle mobile app with inbuilt NFT gaming and Social-fi elements where you can earn rewards in Crypto/NFTs just by movement like walking, running and cycling.

You mint an NFT in the form of sneakers, then by walking, running or cycling you will earn in-game cryptocurrency, which can either be used for in-game activities or cashed out for profit

## MISSION

We aim to nudge people to adopt a healthy and active lifestyle. To achieve this mission, we believe that web 3.0 offers a perfect blend of tools like NFT gaming, Native global currency, Community effect etc, which bring the interesting elements of game-fi, social-fi and real money rewards.

## PROBLEM STATEMENT

Everybody wants to be physically active and fit, but the majority of us struggle to break out from a sedentary life, trying to be more active and fit.

## FAIRLAUNCH releasing

VIM token will be Fair Launch releasing in order to archive:

- A decentralized crypto network that is earned, owned and governed by the community from the outset.
- Everyone can participate on equal footing.
- There is no early access, pre-mine or allocation of tokens.

## TOKEN BURNING

### Sneaker Fusioning

Fusion 2 sneakers to create a new better sneaker

### Sneaker Repair

Repair your shoe so that it has a longer service life and better performance

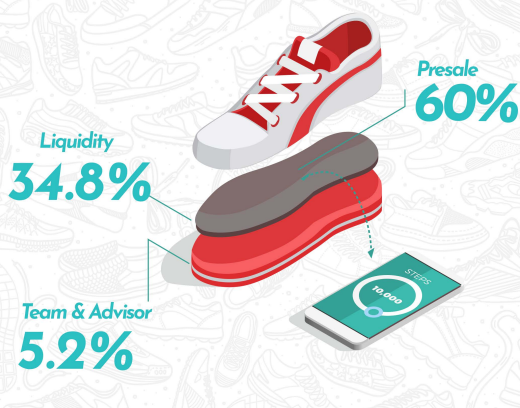

### Gem Encrusted

Encrust gems to your Sneaker costs you some VIM but gives you move daily reward in return

### Level up Sneakers

Each level upgrade will require the user to burn some VIM tokens. Higher level upgrades will require more tokens.
